## Introduction:

I am a Senior React Developer with over 7 years of experience delivering scalable, user-focused web applications. My expertise spans building robust platforms, leading frontend teams, and driving innovative solutions that streamline processes and achieve business goals.

## Skills:

**Frontend:** React.js, Next.js, Gatsby

**State Management:** Redux, Redux-toolkit

**Testing:** Jest, Storybook

**Styling Libraries:** MUI, Tailwind, SASS/SCSS

**Languages:** TypeScript, JavaScript, Java, Ruby

**Backend & Tools:** Firebase, REST APIs

**Validation Libraries:** Zod, Yup

## Experience:

### **Frontend Developer | ProCoders**

*Oct 2021 – Present*

**Technologies:** React, TS, MUI, Redux-toolkit, Storybook, Jest, Zod

The product is a platform for managing global hiring, onboarding, and payroll, ensuring compliance for international teams.

- Led the development of a global hiring platform from concept to launch, enabling seamless team management and payroll compliance for international clients.
- Built an internal React app for demos, enhancing client presentations and securing business opportunities.
- Delivered a client-requested feature that directly secured a key contract, fostering long-term relationships.
- Improved the codebase by refactoring and reducing technical debt.
- Implemented SSO for secure and streamlined user authentication.
- Conducted thorough code reviews and mentored a Junior Developer.

### **Frontend Lead | ProCoders**

*Nov 2020 – Oct 2021*

**Technologies:** React, TypeScript, MUI, Redux-toolkit, Stripe

Developed a multi-user restaurant management app featuring QR-based ordering and payment systems.

- Led the development of the first version, aligning features with business objectives through collaboration with stakeholders.
- Conducted code reviews and mentoring sessions to share knowledge and foster team growth.
- Organized pair-programming sessions to improve team collaboration and skill-building.

## **Frontend Developer | ProCoders**

*Apr 2020 – Nov 2020*

**Technologies:** React, Redux

Worked on an internal CRM system for human resource tracking.

- Delivered new functionalities and refactored existing features to improve system performance.
- Mentored a Trainee, supporting their onboarding and skill development.

## **Freelance Frontend Developer**

*Nov 2019 – Apr 2020*

**Technologies:** React.js, Gatsby.js, Firebase

Developed and deployed an advertising website for a local business.

- Built the website from scratch, implementing SSR with Gatsby.js for optimized performance.
- Deployed the application using Firebase, improving client visibility and user engagement.

## **Java AQA | [Company Name Under NDA]**

*Nov 2018 – Oct 2019*

Developed test automation for a Vendor Management System supporting hiring, compliance, and cost control.

- Automated regression test suites, enhancing software reliability and reducing manual testing efforts.
- Refactored existing tests to improve efficiency and readability.
- Conducted knowledge-sharing presentations for team development.

## **Manual QA | [Company Name Under NDA]**

*Oct 2017 – Nov 2018*

Supported testing for a Vendor Management System.

- Designed and executed test plans to ensure software quality.
- Collaborated with development teams to resolve defects and enhance product quality.
- Mentored a Junior QA team member.

## **Education:**

*2014-2018*

V. N. Karazin Kharkiv National University

**Department:** Radiophysics, Biomedical Electronics, and Computer Systems

**Speciality:** Applied Physics
